Prisma Rules

Every table must contain:

```
id    String @id @default(cuid())
tenantId String
createdAt DateTime @default(now())
```

updatedAt DateTime @updatedAt
deletedAt DateTime?

Index Strategy

Every table:

`@@index([tenantId])`

Frequently searched:

`@@index([status])`

`@@index([createdAt])`

Query Strategy

Never:

`prisma.company.findMany()`

Always:

```
prisma.company.findMany({  
  where: {  
    tenantId  
  }  
})
```

Tenant filtering should become mandatory.
