

MMD V2 - Module Breakdown

1. Module Architecture Overview

The platform is divided into six primary domains.

1. Core Platform
2. CRM
3. ATS
4. Operations
5. Automation
6. Analytics

Each domain owns its data and business rules.

2. Core Platform Module

Purpose

Manage platform-level functionality.

Sub Modules

Authentication

Responsibilities:

- Login
- Logout
- Password Reset
- Session Management

Owns:

- Users
 - Sessions
-

Authorization

Responsibilities:

- RBAC
- Permissions
- Access Control

Owns:

- Roles
 - Permissions
-

Tenant Management

Responsibilities:

- Multi Tenant Isolation
- Branding
- Subscription

Owns:

- Tenants
 - Tenant Settings
-

User Management

Responsibilities:

- User Lifecycle
- Team Management

Owns:

- Users
 - User Profiles
-

Settings

Responsibilities:

- Organization Settings
- System Preferences

Owns:

- Settings
 - Configurations
-

3. CRM Module

Purpose

Manage customer acquisition and business development.

Company Management

Responsibilities:

- Company Records
- Client Management

Owns:

- Companies
- Company Metadata

Dependencies:

- Contacts
 - Requirements
 - Placements
-

Contact Management

Responsibilities:

- HR Contacts
- Decision Makers

Owns:

- Contacts

Dependencies:

- Companies
-

Lead Management

Responsibilities:

- Lead Tracking
- Sales Pipeline

Owns:

- Leads

Dependencies:

- Companies
 - Contacts
-

4. ATS Module

Purpose

Manage recruitment lifecycle.

Requirement Management

Responsibilities:

- Job Requisitions
- Hiring Requests

Owns:

- Requirements

Dependencies:

- Companies
 - Recruiters
-

Candidate Management

Responsibilities:

- Candidate Database
- Resume Management

Owns:

- Candidates
- Candidate Documents

Dependencies:

- Requirements
-

Application Management

Responsibilities:

- Candidate Pipeline

Owns:

- Applications

Dependencies:

- Candidates
 - Requirements
-

Interview Management

Responsibilities:

- Interview Scheduling
- Feedback Tracking

Owns:

- Interviews

Dependencies:

- Candidates

- Applications
-

5. Operations Module

Purpose

Manage revenue-generating activities.

Placement Management

Responsibilities:

- Successful Placements

Owns:

- Placements

Dependencies:

- Candidates
 - Requirements
-

Timesheet Management

Responsibilities:

- Work Tracking

Owns:

- Timesheets

Dependencies:

- Placements
-

Invoice Management

Responsibilities:

- Billing

Owns:

- Invoices

Dependencies:

- Placements
 - Companies
-

6. Automation Module

Purpose

Reduce manual work.

Template Management

Responsibilities:

- Email Templates
- Notification Templates

Owns:

- Templates
-

Workflow Engine

Responsibilities:

- Trigger Based Automation

Owns:

- Workflows

Dependencies:

- All Modules
-

Notification Center

Responsibilities:

- System Notifications

Owns:

- Notifications

Dependencies:

- Workflows
-

Job Scheduler

Responsibilities:

- Scheduled Jobs

Owns:

- Job Queue

Dependencies:

- Workflows
-

7. Analytics Module

Purpose

Business Intelligence and Reporting.

Dashboard Engine

Responsibilities:

- KPI Visualization

Dependencies:

- All Modules
-

Reports Engine

Responsibilities:

- Reports
- Exports

Dependencies:

- All Modules
-

Analytics Engine

Responsibilities:

- Metrics
- Trends

Dependencies:

- All Modules
-

8. Administration Module

Purpose

System Governance.

Audit Logs

Responsibilities:

- Activity Tracking

Owns:

- Audit Logs
-

API Keys

Responsibilities:

- Integration Security

Owns:

- API Keys
-

Webhooks

Responsibilities:

- External Integrations

Owns:

- Webhooks
-

9. White Label Module

Purpose

Tenant Customization.

Branding

Owns:

- Logo
 - Theme
 - Colors
-

Domains

Owns:

- Custom Domains
-

Plans

Owns:

- Subscription Plans
-

10. Data Ownership Matrix

Authentication

Owns:

- Users
- Sessions

CRM

Owns:

- Companies
- Contacts
- Leads

ATS

Owns:

- Requirements
- Candidates
- Applications
- Interviews

Operations

Owns:

- Placements
- Timesheets
- Invoices

Automation

Owns:

- Templates
- Workflows
- Notifications
- Jobs

Administration

Owns:

- Audit Logs
- API Keys
- Webhooks

White Label

Owns:

- Tenants
- Branding
- Domains
