

MMD V2 - Project Folder Structure

1. Folder Structure Philosophy

Goals:

- Feature Driven
- Scalable
- Easy Navigation
- Low Complexity
- Solo Developer Friendly
- Enterprise Ready

Rules:

1. Features own their logic.
 2. Business logic never goes in routes.
 3. Database logic never goes in UI.
 4. Shared utilities stay centralized.
 5. Avoid deep nesting.
-

2. Root Structure

src/ app/ components/ features/ lib/ types/ hooks/ emails/ docs/ tests/

prisma/

public/

scripts/

docker/

.github/

3. App Router Structure

src/app/

(auth)/ (dashboard)/

api/

layout.tsx

page.tsx

loading.tsx

error.tsx

not-found.tsx

4. Auth Routes

(auth)/

login/ forgot-password/ reset-password/

5. Dashboard Routes

(dashboard)/

dashboard/

companies/ contacts/ leads/

requirements/ candidates/ applications/ interviews/

placements/ timesheets/ invoices/

templates/ workflows/ notifications/

reports/

users/ roles/

settings/

6. API Structure

app/api/v1/

auth/

users/ roles/

companies/ contacts/ leads/

requirements/ candidates/ applications/ interviews/

placements/ timesheets/ invoices/

templates/ workflows/ notifications/

reports/

audit-logs/ api-keys/ webhooks/

tenant/

search/

7. Feature Structure

features/

auth/ users/ roles/

companies/ contacts/ leads/

requirements/ candidates/ applications/ interviews/

placements/ timesheets/ invoices/

templates/ workflows/ notifications/

reports/

tenant/

Each feature owns:

controller service repository validator types

8. Example Feature Structure

features/companies/

components/

company-form.tsx company-table.tsx company-details.tsx

services/

company.service.ts

repositories/

company.repository.ts

validators/

company.schema.ts

types/

company.types.ts

constants/

company.constants.ts

9. Shared Components

components/

ui/

table/ form/ modal/ drawer/ card/ tabs/

layout/

sidebar/ header/ footer/

charts/

10. Shared Libraries

lib/

auth/ prisma/ rbac/ storage/ logger/ notifications/ search/ utils/

11. Prisma Structure

prisma/

schema.prisma

seed.ts

migrations/

12. Types Structure

types/

api.types.ts

auth.types.ts

common.types.ts

tenant.types.ts

13. Hooks Structure

hooks/

use-auth.ts

use-permissions.ts

use-pagination.ts

use-search.ts

use-notifications.ts

14. Email Templates

emails/

welcome/

password-reset/

interview-schedule/

placement-success/

invoice/

15. Documentation Structure

docs/

prd/

architecture/

database/

api/

deployment/

security/

roadmap/

16. Testing Structure

tests/

unit/

integration/

e2e/

playwright/

fixtures/

17. Scripts Structure

scripts/

seed/

migration/

maintenance/

cleanup/

18. Docker Structure

docker/

Dockerfile

docker-compose.yml

nginx.conf

19. CI/CD Structure

.github/

workflows/

ci.yml

build.yml

deploy-staging.yml

deploy-production.yml

20. Storage Structure

uploads/

resumes/

documents/

invoices/

logos/

Only for development.

Production uses:

Cloudflare R2

or

AWS S3

21. Service Layer Rules

Allowed:

Route ↓ Service ↓ Repository ↓ Prisma

Not Allowed:

Route ↓ Prisma

22. Repository Layer Rules

Repository Responsibilities:

- Database Queries
- Transactions
- Pagination
- Filtering

No business logic.

23. Service Layer Rules

Service Responsibilities:

- Business Logic
- Validation
- Workflows
- Notifications
- Audit Logging

No direct Prisma access.

24. Validation Rules

Every request validated with:

Zod

Structure:

validators/

entity.schema.ts

25. File Naming Convention

Components:

company-form.tsx

Services:

company.service.ts

Repositories:

company.repository.ts

Validators:

company.schema.ts

Types:

company.types.ts

26. Scalability Strategy

Phase 1

Single Application

↓

Phase 2

Dedicated Worker Service

↓

Phase 3

Separate Analytics Service

↓

Phase 4

Microservices (Only If Needed)

27. Final Structure Benefits

Easy Maintenance

Fast Development

Simple Navigation

Clear Responsibilities

Lower Technical Debt

Multi-Tenant Ready

White Label Ready

Prisma Ready

API Ready

Enterprise Ready
