

MMD V2 - UI/UX Architecture

1. UI/UX Design Principles

The platform must be:

- Simple
- Fast
- Minimal
- Mobile Responsive
- Accessible
- Easy to Learn
- Enterprise Ready

Every page should answer:

1. Where am I?
2. What can I do?
3. What should I do next?

2. Layout Structure

The application follows:

Top Navigation

+

Left Sidebar

+

Content Area

+

Action Panel

3. Global Navigation

Top Bar

Contains:

- Search
 - Notifications
 - Quick Actions
 - Profile Menu
 - Tenant Switcher (Future)
-

4. Sidebar Navigation

Dashboard

CRM

- Companies
- Contacts
- Leads

ATS

- Requirements
- Candidates
- Applications
- Interviews

Operations

- Placements
- Timesheets
- Invoices

Automation

- Templates
- Workflows
- Notifications

Analytics

- Dashboards
- Reports

Administration

- Users
- Roles
- API Keys
- Webhooks
- Audit Logs

Settings

- Organization
 - Branding
 - Preferences
-

5. Dashboard Architecture

Executive Dashboard

Cards

- Total Leads
- Active Requirements
- Candidates
- Placements
- Revenue

Charts

- Lead Trends
- Placement Trends
- Revenue Trends

Tables

- Recent Leads
 - Recent Placements
-

- Team KPI Trends
-

6. CRM User Flow

Company

↓

Contact

↓

Lead

↓

Requirement

CRM should follow this exact hierarchy.

No duplicate company creation.

No duplicate contact creation.

7. ATS User Flow

Requirement

Candidate

Application

Interview

Placement

This becomes the core recruitment pipeline.

8. Lead Conversion Flow

Lead Created

Lead Qualified

Client Discussion

Requirement Created

Lead Converted

Lead remains linked to company forever.

9. Requirement Flow

Requirement Created

Assign Recruiters

Candidate Submission

Interview

Offer

Placement

Invoice

10. Candidate Flow

Candidate Created

↓

Placement Created

↓

Generate Invoice

↓

Track Revenue

12. Screen Types

Every module should have:

List Screen

Create Screen

View Screen

Edit Screen

Activity Screen

Audit Screen

13. List Screen Standard

Top Area

- Search
- Filters
- Export
- Create Button

Middle Area

- Data Table

Bottom Area

- Pagination

Never create custom layouts for every page.

Use one reusable pattern.

14. Create/Edit Form Standard

Sections

General Information

↓

Business Information

Notes

Attachments

Save

Avoid 50-field forms.

Use sections and tabs.

15. Detail View Standard

Header

- Name
- Status
- Actions

Tabs

- Overview
- Activity
- Notes
- Documents
- Audit

Every module should use this same structure.

16. Global Search

Search should work across:

- Companies
- Contacts
- Leads
- Candidates
- Requirements

- Placements

Single search bar.

17. Notification Center

Types

- Success
- Warning
- Error
- Information

Notification drawer available globally.

18. Mobile Experience

Must support:

- Dashboard
- Leads
- Candidates
- Requirements

Complex analytics may remain desktop-first.

19. White Label UX

Each tenant can customize:

- Logo
- Colors
- Login Page
- Email Branding

But navigation structure remains fixed.

20. UX Rules

Never use more than:

3 clicks to reach a record.

Avoid page reloads.

Use server actions where possible.

Use modals only for quick actions.

Keep user context visible.

21. Accessibility Standards

Keyboard Navigation

ARIA Labels

Color Contrast

Responsive Design

Screen Reader Compatibility

22. Future UX Enhancements

Command Palette

AI Assistant

Quick Search

Saved Views

Custom Dashboards

Dark Mode

Advanced Filters

Drag & Drop Pipelines

23. Navigation Hierarchy
